Experiment 6

AIM: Create Product Catalog Application using ASP.NET MVC Architecture. (Controllers, Models, Views, Routing)

Source: view/Product/Index.cshtml

Code:

```
@model IEnumerable<Practical_6.Models.Product> @{
    Layout = null;
}
<!DOCTYPE html>
<html>
<head>
    <meta name="viewport" content="width=device-width" />
    <title>Index</title>
    <link rel="stylesheet" href="https://cdn.jsde-
livr.net/npm/bootstrap@5.3.2/dist/css/bootstrap.min.css" />
    <style>body { padding-top: 20px; }</style>
</head>

<body>
    <div class="container">
        <h2 class="text-center mb-4">Product Catalog</h2>

        @if (Model == null || !Model.Any())
        {
            <div class="alert alert-info">No products to dis-
play.</div>
        }
```

```
            else
            {
                <div  class="table-responsive">
                    <table class="table table-bordered table-striped table-
sm">
                        <thead  class="table-dark">
                            <tr>
                                <th>ID</th>
                                <th>Product  Name</th>
                                <th>Category</th>
                                <th>Price</th>
                                <th>Description</th>
                            </tr>
                        </thead>
                        <tbody>
                            @foreach (var product in Model)
                            {
                                <tr>
                                    <td>@product.ProductID</td>
                                    <td>@product.Name</td>
                                    <td>@product.Category</td>
                                    <td>@product.Price</td>
                                    <td>@product.Description</td>
                                </tr>
                            }
                        </tbody>
                    </table>
                </div>
```

```
            }
        </div>
</body>
</html>
```

Source: Models/Product.cs

Code:

```
using System;
using System.Collections.Generic; using
System.Linq;
using System.Web;

namespace Practical_6.Models
{
    public class Product
    {
        public int ProductID { get; set; } public
        string Name { get; set; }

        public string Description { get; set; }

        public int Price{ get; set; }

        public string Category { get; set; }

    }
}
```

Source: Controllers/ProductController.cs Code:

```
using System;
using System.Collections.Generic; using
System.Linq;
using System.Web; using
System.Web.Mvc;
using Practical_6.Models;

namespace Practical_6.Controllers
{
    public class ProductController : Controller
    {
        // GET: Product
        public ActionResult Index()
        {
            List<Product> products = new List<Product>()
            {
                new Product
                {
                    ProductID = 1, Name
                    = "Laptop",
                    Category = "Electronics", Price
                    = 50000,
                    Description= "A high-performance laptop for all your
computing needs."
                },
```

```
                new Product
                {
                    ProductID = 2,
                    Name = "Mouse",
                    Category = "Accessories", Price
                    = 500,
                    Description= "A wireless mouse with ergo-nomic
design for comfortable use."
                },

                new Product
                {
                    ProductID = 3, Name =
                    "Keyboard",
                    Category = "Accessories", Price
                    = 1000,
                    Description= "A mechanical keyboard with customizable
RGB lighting and tactile feedback."
                },

                new Product
                {
                    ProductID = 4, Name
                    = "Mobile",
                    Category = "Electronics", Price
                    = 25000,
                    Description= "A smartphone with a high-res-olution camera
and long-lasting battery life."
                }
```

```
            };
            return View(products);

        }
    }
}
```

Output: Screenshot:

Product Catalog

ID	Product Name	Category	Price	Description
1	Laptop	Electronics	50000	A high-performance laptop for all your computing needs.
2	Mouse	Accessories	500	A wireless mouse with ergonomic design for comfortable use.
3	Keyboard	Accessories	1000	A mechanical keyboard with customizable RGB lighting and tactile feedback.
4	Mobile	Electronics	25000	A smartphone with a high-resolution camera and long-lasting battery life.
